

WHAT IS THE CONNECTICUT ENVIRONMENTAL RIGHTS AMENDMENT AKA GREEN AMENDMENT?

The CT Green Amendment...

- ✓ recognizes your right to a healthy environment; a stable climate; and self-sustaining ecosystems
- ✓ helps address environmental racism by obligating government to equitably protect the rights of all people
- ✓ requires government to address cumulative impacts of pollution and ensure full scientific consideration
- ✓ focuses government on preventing pollution and environmental degradation rather than simply permitting it

The CT Green Amendment will...

- ✓ be placed in our state constitution's Bill of Rights, protecting environmental rights along with our other fundamental freedoms such as speech and religion
- ✓ protect our environment and climate for both present and future generations
- ✓ raise up environmental justice so it is given highest constitutional standing and enforceability
- ✓ strengthen our existing laws and ensure protection against legal loopholes that result in unconstitutional harm

The battle to save our water, air, climate & environment must be won today, before we reach the point of no return.

Across Connecticut, communities are drinking polluted water, breathing unhealthy air, and being impacted by climate change with no remedies in sight.

A Connecticut Green Amendment will ensure that all government officials in the state both recognize and protect our rights to clean and healthy air, water, and soil; a stable climate; healthy environments and true environmental justice for all.

Our environment is our greatest asset. It protects our health, our economy, the quality of our lives and the sanctity of our homes. We all need clean water, air and healthy environments to live and thrive. It is just and right that our environmental rights are given highest constitutional protection.

**GREEN AMENDMENTS
FOR THE GENERATIONS**
Pure Water. Clean Air. Healthy Environment.
